

# Flyintower 16-2,000

Support tower for for audio systems. Designed in RL105A, this new Flyintower is suitable for 2,000 kg loads and can reach the height of 16 meters, thus ensuring sturdiness and rigidity on relevant heights. It also utilized QH30SA trusses as stabilizing elements and is equipped with fork connections.

Maximum tower height	→	16 m
Vertical main truss	→	RL105A
Base dimensions	→	680 x 800 cm
Maximum lifting load capacity	→	2,000 kg
Guy ropes	→	not needed
