

# Flyintower 10-1,600

Support tower for for audio systems. Designed in QL40A, this new Flyintower is suitable for 1,600 kg loads and can reach the height of 10 meters, thus ensuring sturdiness and rigidity on relevant heights. It also utilized QH30SA trusses as stabilizing elements and is equipped with fork connections.

Maximum tower height	→	10 m
Vertical main truss	→	QL40A
Base dimensions	→	580 x 750 cm
Maximum lifting load capacity	→	1,600 kg
Guy ropest	→	not needed
