

LIBERA FL105

20x16m DOUBLE-PITCH

This is the largest roof system in the LIBERA range, and one of the biggest and best performing on the market. It is based on the LIBERA concept and consists of Maxitower 76 and LIBERA FL105 trusses. It is imposing and sturdy, and is – in itself – the most spectacular element of the show. The structure has excellent technical specifications and is highly modular.

Dimensions	20 x 16 m
Heights range*	from 10 to 16 m
Main truss	LIBERA FL105
Towers	6 x Maxitower76
Uniformly distributed load UDL **	15000 kg ≈
Chain hoists	2000 kg
Total weight	11700 kg
Volume	112 m ³
Set-up time & number of workers	6 hrs / 6 w

* Range suggested according to the dimensions of the roof system.

** Indicative loading data for use in environments without wind. For details and further information, please consult the technical specifications or contact our engineering department or distributors.

For details and further information, please consult the technical specifications or contact our engineering department or distributors.

The examples and data shown on these pages are necessarily indicative owing to the extreme variability of the conditions in which the structures may be assembled. Each installation must be provided with a suitable quantity of ballast, as shown on the product certificates.

This line of structures was created in compliance with European standards.

Use of these systems is governed by laws which vary according to the country they are assembled in. They must be put together in compliance with the local regulations in force.
