QL52A

15 x 12 m Double-pitch

High Load roof systems are particularly suitable for medium-sized covered structures.

They consist in load bearing trusses with universal fork connections for high-end solutions.

For details and further information, please consult the technical specifications or contact our engineering department or distributors.

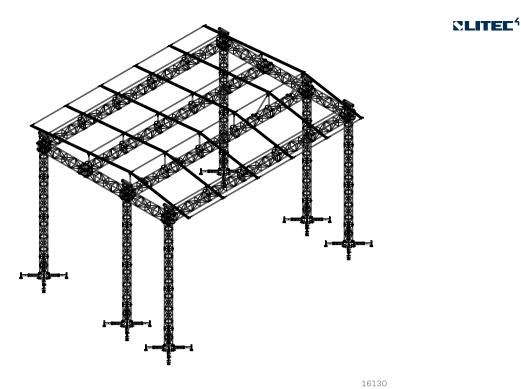

The examples and data shown on these pages are necessarily indicative owing to the extreme variability of the conditions in which the structures may be assembled. Each installation must be provided with a suitable quantity of ballast, as shown on the product certificates.

This line of structures was created in compliance with European standards. Use of these systems is governed by laws which vary according to the country they are assembled in. They must be put together in compliance with the local regulations in force.

260 Roof systems

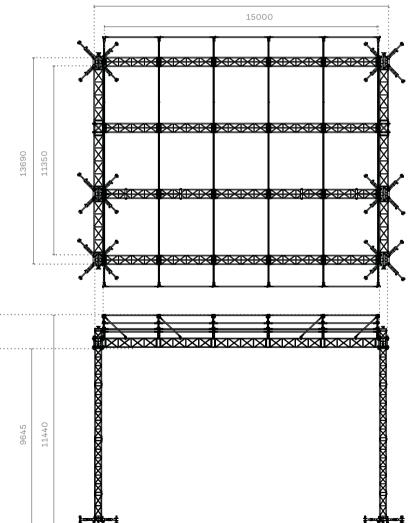

^{*} Range suggested according to the dimensions of the roof system.
