RL105A

24 x 16 m Double-pitch

They are strong and sturdy roof systems totally built in RL105A trusses and Maxitowers 52.

They are thought for big installations on wide spans.

They feature new built-in guides for inserting roof sheets and a four-way sleeve block which is compatible with LIBERA FL105.

The examples and data shown on these pages are necessarily indicative owing to the extreme variability of the conditions in which the structures may be assembled. Each installation must be provided with a suitable quantity of ballast, as shown on the product certificates.

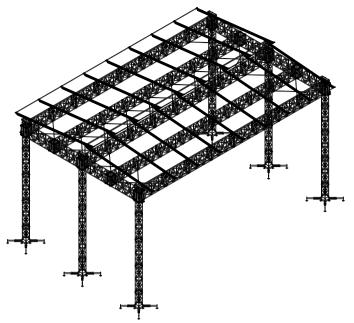

This line of structures was created in compliance with European standards. Use of these systems is governed by laws which vary according to the country they are assembled in. They must be put together in compliance with the local regulations in force.

268 Roof systems
